

Casa Futura Technologies Basic Fluency System

Categories: Speech

Manufacturer: Casa Futura

A system that plugs into your telephone. The user hears the caller's voice and the auditory feedback through the headset, reducing background noise. Telephone also provided.

Features

- Auditory feedback: DAF, FAF
- Background noise reduction: noise-canceling directional microphone, high-frequency filters, dynamic expansion.

Specifications

- Includes anti-stuttering device and headset
- Corded telephone with an AC adapter
- Therapy manual
- Requires modular jack

Note: Person must be working with a Speech Pathologist and obtain a letter from the Speech Pathologist stating the person will benefit from the biofeedback system. Equipment will only be sent to the Speech Pathologist who will adjust the settings for the individual.
